Fundamentals of Molecular Spectroscopy
Banwell, Colin N. McCash, Elaine M.

PU11508
535.84 BAN; 7

This revision of Dr. Branwell's highly popular text retains the features which have made it so attractive to students and lecturers over the years. It remains an elementary and non-mathematical introduction to molecular spectroscopy that emphasizes the overall unity of the subject and offers a pictorial perception rather than a mathematical description of the principles of spectroscopy.
